

HURON FAMILY ASTRONOMY NIGHT! 2012·03·1

The Astronomy Club invites the Huron Community to attend Family Astronomy night next Thursday, March 1. We are planning various activities that should be of interest to everyone in the Huron community. We will have activities for young kids, lectures by some professional astronomers. If there are clear skies, we expect members of the Royal Astronomical Society of Canada will bring their telescopes and let us have a deep peek into the sky.

Bring your binoculars!

Keep looking up!

*After Apollo 12 left lunar orbit this image of the Moon was taken from the command module on 11/24/69.
